Technical Specification of Sanitary Pads Disposal Machine

प्रमुख प्रशासकिय अधिकृत

Budhiganga Municipality
Office of The Municipal Executive
Kuldevmandu, Bajura
Sudurpashchim Province

This technical specification of sanitary pads disposal machine equipment is a product of the hard work of a group of experts and professionals. I wish to extend my gratitude towards the specification development team for their dedication, input and for their commitment throughout the overall process of specification development.

The Child Health Division (CHD) and Logistics Management Division (LMD) deserve recognition for taking the lead and UNICEF, WHO and Lifeline Nepal are acknowledged for providing technical and financial assistance for this activity.

This document is required for the selection and procurement of standard and quality disposal machine.

प्रमुख प्रशासकीय अधिकृत

Introduction

In Sanitary pad disposal machines are devices designed to provide a hygienic and convenient solution for the disposal of menstrual pads. Menstrual hygiene is a critical issue for women worldwide, and the proper disposal of menstrual products is essential to maintain a clean and sanitary environment. Many women struggle with the challenges of disposing of their menstrual products in public restrooms, especially in areas where facilities are limited or inadequate. Sanitary pad disposal machines are typically installed in public restrooms, such as schools, offices, hospitals, and other public spaces. These machines offer a discreet and convenient option for women to dispose of their menstrual products without having to carry them around or worry about odor and cleanliness. The machines are usually wall-mounted and equipped with a bin for collecting used pads.
